

To Erredue Italy,

We at Holthausen Energy Points are pleased to provide this letter of reference for ErreDue S.p.A., with whom we have maintained a strong and productive partnership over the past five years.

Our collaboration began with the successful delivery of our first alkaline hydrogen electrolyser, marking a significant milestone in our journey towards a sustainable and emission-free energy infrastructure. Since then, ErreDue has continued to support us with multiple alkaline electrolysers, all of which are now in active operation across the Netherlands.

Throughout our relationship, ErreDue has consistently demonstrated technical excellence, reliability, and a strong commitment to customer support. Their engineering team has shown in-depth knowledge and responsiveness, particularly during commissioning, maintenance, and remote troubleshooting. This level of service has enabled us to deliver high-purity hydrogen to our clients without interruption, while also supporting the broader mission of grid balancing and green energy transition.

We value our relationship with ErreDue and confidently recommend them as a supplier of hydrogen generation technology. Their professionalism and quality of solutions make them a trusted partner for any company seeking advanced and dependable electrolyser systems.

In use we have now from Erredue,

2x 250 kW Hydrogen Generators 30 Bar

1x 500 kW Hydrogen Generator 30 Bar

1x 1.000 Kw (1 Megawatt) Hydrogen Generator 30 Bar

All Generators runs perfect and are in dally use.

Should you require any further information, please do not hesitate to contact us.

Sincerely,

Carl Holthausen

CEO

Holthausen Energy Points B.V. & Holthausen Gasses, the Netherlands
